Forecast for Thursday 29 Jul 2021

Weather: The odd light shower persisting through the early hours, before fading away. A generally bright and dry morning follows, though with some patchy cloud around at times. Turning more widely cloudy during the afternoon, but staying dry. Later on in the evening, some light rain showers may begin to develop.

Chance of cloud free mountain/hill tops above 600m: 70% through the first half of the morning, rising to 90% from then on.

Visibility: Largely very good through the day. Some isolated patches of lower cloud at 500-600m affecting western slopes through the first half of the morning, bringing moderate visibility. Cloud bases then generally above the summits for the rest of the day. Visibility may drop slightly later in the night with the development of any light showers.

Meteorologist's View

Feels like temperatures could be quite variable through the day. Although any sunny intervals may be pleasant, brisk winds will make it feel much cooler, particularly at height.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Wed 28 Jul 2021	13.2mm	18mm	18mm

Forecast for Friday 30 Jul 2021

Weather: Cloudy to begin with rain moving across the park, which may be heavy on occasions. This will begin to clear later in the morning, with a mixture of sunny spells and showers from then on. These showers could also be heavy with the risk of an isolated thunderstorm.

Maximum wind: Winds on the summits initially southeasterly 15mph. Transitioning to northwesterly through the morning and speeds increasing to 20mph, gusting 30mph.

Chance of cloud free mountain/hill tops above 600m: 60% to begin, rising to 80% from late-morning onward.

Visibility: Cloud bases in the early falling to 400-500m in association with the rain passing over and obscuring higher slopes. Bases generally above the summit from late-morning onward, but temporarily falling back below as a result of the passing showers. Visibility good outside of any precipitation, but becoming poor in any heavy rain or showers.

Temperature: **Valleys:** Plus 11 Celsius, rising to plus 18 Celsius.
At 600m: Plus 8 Celsius, rising to plus 11 Celsius.
Freezing level: Above the summits.
